

Redesign Worksheet

Name

The session I'm rebuilding

Where, and how long

The question for all three weeks: what do we need people to do differently, and how will my teaching make that happen?

The six canvas boxes, and where you fill them: **Learners 1** **Need 2** **Outcomes 5** **Evidence 5** **Activities 3 4** **Follow-through 6**

1 Learners and context

Session 1

Who will be there? *Roles, roughly how many.*

What can they already do?

Where and when? What interrupts it?

2 The need

Session 1

What happens now? What should happen instead?

Can teaching fix that? If not, or not on its own, who needs to hear about it?

Boxes 1 and 2 are touched on in the sessions, not taught. To go deeper, ask your education lead about the Teaching Design Check.

3 My slides

Session 1 · before the ask

The slide I redesigned: what I cut, and why

What's left, and who each piece is for

Back-row check: ☐ big enough ☐ strong contrast ☐ nothing relies on colour alone

The next one or two slides I'll change

4 What learners do

Session 2 · before the ask

Ten minutes of my session where learners do something. *One sentence, starting with a verb.*

Strategy: ☐ retrieval ☐ spacing ☐ interleaving ☐ elaboration

Where it really happens, and what happens if someone is called away

What I need *(kit, cards, a timer, someone to help)*

Tool, if any: ☐ paper ☐ Menti ☐ Kahoot ☐ other _____

Your Menti or Kahoot goes here as what learners do, not as the tool: "answer three quick questions at the start of handover (retrieval), on Kahoot or on paper".

5 Line it up

Session 3 · rewrite your outcomes, then check across

	By the end, learners will be able to... <i>a verb you could watch</i>	Level <i>knows about · knows how · shows how · does</i>	What they do to practise it <i>from 3 and 4</i>	How I'll know, and when
1				
2				
3				

Read across each row.

- Could you watch someone do the verb?
Understand, be aware of, appreciate: rewrite.
- Does the activity practise that verb?
- Is the evidence at the same level? A quiz can't show "does".

Example row (a 10-minute ward teaching moment):

Total a 24-hour fluid balance chart · *shows how* · total a mock chart in pairs, then swap and check · checked on the spot; then the ward's documentation audit at 2 and 4 weeks

6 Follow-through

Session 3

	What learners will revisit	How <i>a quiz, a huddle question, a team message...</i>
30 days		
60 days		
90 days		

Who will hold me to it? *Name or role.*

What I need from them *(time, release, a slot at the team meeting...)*

When I'll tell them

My commitment

Session 3 · close

The one thing I'll do differently is...
